

DEPARTMENT OF ENVIRONMENTAL SCIENCE

SRI DEV SUMAN UTTARAKHAND UNIVERSITY, BADSHAHITHAUL

'SYLLABUS'

FOR

B. Sc. ENVIRONMENTAL SCIENCE

[AS PER NATIONAL EDUCATION POLICY (NEP)-2020]

FACULTY OF SCIENCE

2023

**MEMBERS OF BOARD OF STUDIES (BOS) IN
ENVIRONMENTAL SCIENCE (BOS HELD ON 11.07.2023)**

Prof. Gulshan Kumar Dhingra
Dean Science and Professor & HOD Botany
Pt. L. M. S. Campus, Sri Dev Suman Uttarakhand University

Dr. S. K. Kuriyal
Assistant Professor of Botany
Pt. L. M. S. Campus, Sri Dev Suman Uttarakhand University

Dr. Vikas Saini

Assistant Professor of Environmental Science
Swami Vivekanand College of Education, Roorkee

Prof. Kusum Arunachalam
(External Subject Expert)
Dean & Head, School of Environmental Science,
Doon University, Dehradun

Prof. Pushpa Negi
Principal,
GPGC, New Tehri

Prof. Pankaj Pant
Principal,
GPGC, Nagnathpokhri

Prof. K.S Negi
Principal,
GPGC, Khanpur

Prof. Anita Rawat
Director, USERC

CURRICULUM STRUCTURE FOR THE UNDERGRADUATE DEGREE PROGRAMME - B.Sc.

Semester	Title /Name of the course	Course out comes that the course addresses	Pre-requisite course(s)	Pedagogy	Assessment
----------	---------------------------	--	-------------------------	----------	------------

Total Credits for the Programme: 192

Starting year of implementation: 2022-2023

Name of the Degree Programme: B.Sc.

Discipline /Subject: Environmental Science

Programme Articulation Matrix

Semester	Title /Name of the course	Course out comes that the course addresses	Pre-requisite course(s)	Pedagogy	Assessment
1	BES-C-101 –Basics of Environmental Science	To develop the knowledge and understanding for Basic concepts of the Environment Science and applied ecology including the holistic relationship between them.	Intermediate or equivalent in science subjects	Theory and Course projects	Continuous internal assessment (Formative assessment)-25%. End Semester Examination (Summative assessment)- 75%
	BES-C-151 –Lab Course	To provide the basic understanding of various ecosystem components and their on filed understanding.		Practical	

2	BES-C-201 – Natural Resource management	To develop the sound knowledge of Natural Resource and Application of various management practices.	Theory, case Studies and course	Continuous internal assessment)-25%. End Semester Examination(Summative assessment)-75%
	BES-C-251- Lab Course	To provide a basic understanding of various natural resources in India through map studies for regional and national knowledge.		

Exit option with Certificate in Science

Job opportunities for the Exit option with Certificate

- Sampling Assistant in waste water treatment plants
- Analytical Assistant/Intern analyst in water testing laboratories
- Laboratory instructor in educational institutions
- Field Technician in mobile environmental laboratories
- Field Technician in Research institutions/NGOs involved in environmental monitoring/carbon credit establishment/productivity studies.
- Sampling and execution assistant in environmental auditing
- Garden/nursery Supervisor/Entrepreneurship
- NGOs/Consultancy firms
- self-employment

2023

Semester	Title /Name of the course	Course outcomes that the course addresses	Pre-requisite course(s)	Pedagogy	Assessment
3	BES-C-301- Environmental Pollution	To develop a sound knowledge of definition, types and control measures of different types of pollution.	Certificate in Science with Environmental Science as a subject and a total credit score of 50	Theory, case studies and problem solving methods	Continuous internal assessment (Formative assessment)-25%. End Semester Examination (Summative assessment)-75%
	BES-S-302- Environment and public health	To develop the understanding and knowledge for public health in relation to environment including various types of diseases and their control measures.			
	BES-C-351- Lab Course	To provide the basic practical knowledge of air, water, soil and noise sampling and analysis.			
4	BES-C-401- Solid Waste management	To provide the basic understanding of different types of Solid waste and management practices.	Certificate in Science with Environmental Science as a subject and a total credit score of 50	Theory, case studies and problem solving methods	Continuous internal assessment (Formative assessment)-25%. End Semester Examination (Summative assessment)-75%
	BES-S-402- Environmental sustainability and Economics	To provide the knowledge and understanding on sustainable development, policies along with basics of environmental economics.			
	BES-C-451- Lab Course	To provide the practical knowledge for various types of solid waste and management techniques.			

Job opportunities for the Exit option with Diploma in Science

- Procurement, processing, value addition and Marketing of NTFPs-Executive/Entrepreneurship
- Procurement of Medicinal Plants-Marketing/Entrepreneurship
- Lab assistant in educational institutions/ Wildlife and Ecotourism guides
- Public Health/Waste Management Assistants in Municipalities
- Incinerator operators in small establishments
- NGOs/Consultancy firms/Self-employment

409

BES-C-651 - Lab Course

To create the practical knowledge and understanding on environmental management practices, natural disasters, auditing including case studies of Uttarakhnad State.

Hands-on-training
and field studies

Job opportunities for the Exit option with Bachelor of Science Degree

- Assistants in Central and State Pollution Control Boards
- Environmental Health and Safety Assistant in industries
- Occupational Health and Safety Assistant in industries/theme parks
- Public Health/Waste Management Officers in Municipalities
- Waste water Treatment Plant Managers
- Environmental/Production Quality Assurance Executive-Junior
- Environmental Analyst (Validation)
- Research Assistant/Staff
- R&D Lab Assistant
- Water testing labs or chemical suppliers/Entrepreneurship
- Liaison Officer
- Watershed Management Assistant
- Mineral/Energy Resource Exploration Assistant
- Solar energy/alternate energy Executives
- Micro irrigation Executives
- Organic Farming Executives/Entrepreneurship
- NGOs/Consultancy firms
- Teachers in Schools
- Self-employment

G. O. D. 

B.Sc. Semester – I

BES-C-101 - Basics of Environmental Science

Unit – 1

Environmental Science: Definition, Aim of study and Scope and importance. Differences between Ecology and Environmental Science. Components of the Environment: Definitions of Atmosphere, Hydrosphere, Lithosphere and Biosphere - their complex interactions and significance.

Unit – 2

- Ecosystems – Definitions. Classification of the ecosystem – Terrestrial and Aquatic with their divisions. Structure of the ecosystem - Function of ecosystem - food chain – food web, Ecological pyramids. Energy flow in an ecosystem.

Unit – 3

Biotic and Abiotic factors: Influence Temperature, Wind and Water, Edaphic, Topographic on flora and fauna and their relationship.

Unit - 4

Ecological Niche: Concept and Types of niches: Spatial, Trophic and Multidimensional – Niche parameters: Form, Position and Width – Niche Partitioning - Realized and Fundamental Niche. Biomes: Definition and concept. Classification of biomes.

Unit - 5

Ecological succession – Primary and Secondary succession – Natural and man-influenced succession, – Hydrarch and Xerarch - Climax vegetation and their theories; Ecotone and Edge effect; Ecological equivalents; Ecotypes and Ecophenes; Ecological indicators.

6-017

BES - C - 151: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100

Sessional: 25 ESP: 75

A. Ecosystem Studies (2 exercise will be given)	15 + 10 = 25
1.To study and enlist various biotic and abiotic components of forest Ecosystem.	
2.To study and enlist various biotic and abiotic components of Desert Ecosystem.	
3.To study and enlist various biotic and abiotic components of Grassland Ecosystem	
4.To study and enlist various biotic and abiotic components of Aquatic Ecosystem	
B. To study the structure of Atmosphere	10
C. To study the different food chains & ecological pyramid of different ecosystem	10
D. Collection of different species of aquatic macrophytes in River Ganga	10
E. Viva Voce	10
F. Practical record/Chart/Model	5
G. Assignments	5
Total	75

G. D. H.

Semester - II

BES-C – 201: Natural Resource Management

UNIT 1:

Natural Resources: Introduction, types - renewable and non-renewable; resource conservation; resource availability and factors influencing its availability; Resource and resource degradation.

UNIT 2:

Forest Resources: Importance, types of forest, forest products, Non-timber forest products. Deforestation (forest fires, forest land degradation, Illicit felling, grazing, shifting cultivation etc.), Forest conservation measures– Social forestry (Farm forestry, village forestry, agroforestry, extension forestry).

UNIT 3:

Water resources: Importance, types of water resources, water resources of India, freshwater (groundwater, surface water), Marine water (Saline and brackish Water), depletion of water resources, Overexploitation of water resources, Water conservation, Rain water harvesting.

UNIT 4:

Energy Resources: Renewable and non-renewable energy resources. Solar Energy, Wind energy, biomass energy, hydrothermal energy. Fossil fuels, coal, petrol and natural gases, biogas and green energy.

UNIT 5:

Land Resources: types, food resources, mineral resources and reserves, ocean ore and recycling of resources, Environmental impact of exploitation, processing and smelting of Mineral, oceans as need areas for exploitation of Mineral resources.

G. D. M.

BES - C - 251: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100
Sessional : 25 ESP: 75

A. Map studies	15 + 10 = 25
a. Different forest types of India	
b. Different mineral reserves of India	
B. Map studies (any two)	10 + 10 = 20
a. Different freshwater river systems of India	
b. Different freshwater lake/reservoir system of India	
c. Different brackish water systems of India	
d. Different wetlands of India	
C. To map study the protected area networks of India	10
D. Viva Voce	10
E. Practical record/Chart/Model	5
F. Assignments	5
Total	75

G-Dh 

Semester – III

BES –C-301: Environmental Pollution

Unit – 1

Environmental pollution: Definition, Types. Environmental contaminants and environmental pollutants. Classification of pollutants – on the basis of physical properties and forms of their existence. Primary and secondary pollutants, degradable and non-degradable, point and non-point sources of pollution.

Unit – 2

Air pollution: Definition, sources of air pollution and their effects on flora, fauna, human beings and materials. Indoor pollution, automobile pollution, ozone depletion and recovery, global warming and climate change.

Unit - 3

Water pollution: Definition, types (Surface, groundwater, marine) and sources of water pollution and their effects. Water quality criteria – specifications for drinking and inland surface waters. Water Quality Indices.

Unit - 4

Soil pollution: Definition, sources and types, Soil pollutants, Effects of pollution on soil health and productivity. Effects of pesticides on soil, Soil erosion, types and control.

Solid waste pollution: Definition, origin, classification and characteristics of solid waste. Segregation, collection, transportation and disposal of solid waste.

Unit - 5

Noise pollution: Definition, sources and effects. Noise-induced hearing loss. Decibel scale. Noise control measures.

E-waste: Definition, sources, composition, recycling and disposal methods. Hazardous waste: Definition, Sources, classification, effects and disposal methods.

C-012

Unit – 1

Environment and public health: Definitions of health and disease. Perspectives on individual health: Nutritional, socio-cultural and developmental aspects, Dietary diversity for good health; Human developmental indices for public health.

Unit - 2

Diseases in contemporary society: Need for good health - factors affecting health. Types of diseases - deficiency, infection, pollution diseases - allergies, respiratory, cardiovascular and cancer. Personal hygiene- food- balanced diet.

Unit - 3

Malnutrition: Vitamin deficiency diseases and Mineral deficiency diseases; Folic acid requirement during pregnancy; Food Safety- Adulterants and preservatives; Pesticide Toxicity: Endosulfan and DDT.

Unit - 4

Non-communicable diseases and Lifestyle diseases - Diabetes and Hypertension. Communicable diseases: Definition, mode of transmission – pandemic, epidemic and endemic diseases.

Unit - 5

Vector borne diseases: Plague and Malaria; emerging diseases: Dengue, Chikungunya, Zika, Ebola, Swine Flu, Bird Flu, Severe Acute Respiratory Syndrome (SARS), Middle East Respiratory Syndrome (MERS); Zoonosis- Leptospirosis; Kyasanur Forest Disease (KFD) Toxoplasmosis and Nipah.

G-017 

BES - C - 351: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100

Sessional: 25 ESP: 75

A. Air Sampling Techniques for gases and particulate matter	15
B. Water Sampling Techniques	10
- Sampling design (water samplers)	
- Water Temperature	
- pH	
- Turbidity/Transparency	
- Hardness	
C. Soil Sampling Techniques	10
- Sampling design	
- Soil Temperature	
- pH	
- Bulk Density	
- Water holding Capacity	
D. Noise sampling Techniques and observations on different sites	10
(Railway Station/National Highway/University campus/Residential area)	
E. Survey from the local hospitals for communicable and non-communicable diseases among patients	10
H. Viva Voce	10
I. Practical record/Chart/Model	5
J. Assignments	5
Total	75

G. O. H. 

Semester – IV

BES – C- 401 Solid Waste Management

UNIT 1:

Sources, generation, classification & composition of solid wastes. Solid waste management methods - Sanitary land filling, Recycling, Composting, Vermi composting, Incineration, energy recovery from organic waste.

Unit - 2

Solid Waste Management Plan, Waste minimization technologies, Hazardous Waste Management, Sources & Classification, physicochemical properties, Hazardous Waste Control & Treatment.

UNIT 3

4R- reduce, reuse, recycle and recover; biological processing - composting, anaerobic digestion, aerobic treatment; reductive dehalogenation; mechanical biological treatment; green techniques for waste treatment.

UNIT 4

Concept of Integrated waste management; waste management hierarchy; methods and importance of Integrated waste management.

Concept of waste-to-energy (WTE), energy recovery from waste; different WTE processes: combustion, pyrolysis, landfill gas (LFG) recovery; anaerobic digestion; gasification

UNIT 5

Municipal Solid Wastes (Management and Handling) Rules 2000; Hazardous Wastes Management and Handling Rules 1989; Bio-Medical Waste (Management and Handling) Rules 1998; Eco-friendly or green products.

BES – S- 402 Environmental Sustainability and Economics

Unit - I

Sustainable Development – scope & definition, parameters of sustainability, Population stabilization, integrated land use planning, conservation of biological diversity, control of pollution, development of non-polluting renewable energy systems.

Unit - II

Recycling of wastes/residues, ecologically compatible human settlement and slum improvement, environmental education and awareness.

Unit - III

Sustainability of Water Resources, Sustainable Management of Forests, sustainable agricultural rotation of crops, organic farming. Urbanization and its impact on Environment.

Unit – IV

Environmental movements and role of NGO's in sustainable development. Global policy for sustainable development – world summits. Rural and Urban planning for sustainable development.

Unit - 5

Fundamentals and theories of environmental economics: Principles of cost-benefit analysis, Joint forest management for optimal property rights, economics of forest products in India. Environmental Statement (ES), ES of Government of India and its contents, Introduction to environmental audit: Guidelines and methodology, purpose and needs;

G. D. S.

BES - C - 451: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100

Sessional: 25 ESP: 75

A. To segregate and composition percentage of (any two)	15 + 10 = 20
- domestic solid waste	
- Hospital solid waste	
- Industrial solid waste	
B. Preparation of biogas from sewage-sludge (field vist)	10
or	
Listing of different NGO's working in Environmental Activities at Haridwar	
C. To study the SDG goals in context of India	10
D. Site visit and report for Municipal Solid waste management plant	10
diseases among patients	
E. Viva Voce	10
F. Practical record/Chart/Model	5
G. Assignments	5
Total	75

G. P. S. 

Semester – V
BES – E – 501
Environmental Microbiology and Toxicology

UNIT – I

Environmental Microbiology: Introduction, Microorganisms in the environment, role of microbes in ecosystem, Air microbiology, Introduction, microorganisms in air, role of microbes in atmosphere.

UNIT – II

Soil microbiology: Introduction, microorganisms in soil, role of microbes in biogeochemical cycles (Oxygen, carbon-dioxide, Nitrogen, Sulphur and phosphorous). Water microbiology; introduction, microorganisms in water, Role of microbes in the water environment.

UNIT – II

Microbiological analysis, laminar air flow, autoclaving, preparation of culture media, microorganisms and diseases: epidemiology, modes of transmission, controls of communicable diseases, air-borne diseases (tuberculosis, chicken-pox), soil-borne diseases (tetanus and gas-gangrene). Anti-microbial agents and their significance.

UNIT – III

Water and food-borne diseases (Cholera, Typhoid, Amoebiasis), Contamination of food, microbial spoilage of food, Role of microbes in oil-pollution control and chemical pollution control, Ecological and public health impacts of raw sewage and domestic liquid discharge.

UNIT – IV

Toxicology – Definitions, Classification, Toxic chemicals in the environment. Mode of entry of toxic substance, Heavy metals toxicity, Epidemiological issues goiter, fluorosis, arsenic poisoning.

UNIT – V

Xenobiotics in the environment. Pesticides – Classification of pesticides, Bioaccumulation, Biotransformation, toxic effects of pesticides in the environment. Detoxification.

6-06

BES – E – 502
Environmental Chemistry and Instrumentation

UNIT – I

Fundamentals of environmental chemistry: Stoichiometry, Gibbs' energy, Henry's law, chemical potential, chemical equilibria, acid-base reactions, carbonate system, the solubility of gases in water, carbonate system, unsaturated and saturated hydrocarbons.

UNIT – II

Chemical composition of Air: Classification of elements, chemical speciation, particles, ions and radicals in the atmosphere, Transport media, transport of pollutants in the air.

UNIT – III

Water chemistry: Chemistry of water, the concept of DO, BOD, COD, dispersion of pollutants in groundwater, biochemical processes in water involving microorganisms.

UNIT – IV

Inorganic and organic components of soil, Nitrogen pathways, NPK in soil and their interaction. Soil pollution control. Industrial waste/ effluents and heavy metals in soil and their interactions.

UNIT – V

Principles of analytical methods: Microscopy (Scanning & Transmission) Colorimetry, Flame photometry. Spectrophotometry, Chromatography Atomic Absorption Spectrophotometry, Electrophoresis and Respirable Dust Sampler (RDS) .

G. D. S. 

BES – E – 503
Occupational Health & Safety

Unit - I

Occupational Health Hazards, Promoting Safety, Safety and Health training, Stress and Safety. Importance of Industrial safety, the role of safety department, Safety committee and Function Organising for safety, Health and Environment.

Unit – II

Bureau of Indian standards on safety and health 14489 - 1998 and 15001 - 2000
OSHA, Process Safety Management (PSM) as per OSHA, PSM principles,
OHSAS 18001, EPA Standards, Performance measurements to determine the effectiveness of PSM

Unit III

Safety protocol: used in Grinding, Shearing, Bending, Boring, mining, Shaping Safe use of hand tools, non-sparking tools, portable power tools. Guarding of different types of machinery including special precautions for paper, rubber and printing machinery, wood working.

Unit - IV

Operation, inspection and maintenance of industrial trucks, loose gears conveyors, Safe working load for mechanical material handling equipments. Employee participation in safety - Role of Trade union in safety, health and environment. Safety promotion and safety awards, safety, competitions, audio visual publication.

Unit – V

Factories Act, 1948, Workman's Compensation Act, 1943, Employees State Insurance Act, 1948. Mines and minerals (regulation and development) Act 1957. The factories rules, History, Provisions under the factories Act and rules made there under with amendments, Functions of safety management.

G-012 

BES - C - 551: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100

Sessional:25 ESP: 75

A. Principle and functioning of following instruments	5 + 5 + 5 = 15
(Three exercise to be given)	
- pH meter	
- hydrometer	
- turbidymeter	
- secchi disk	
- Noise meter	
- Lux meter	
- Anemometer	
- Rain Gauge	
B. Microbiological Techniques (streaking, pouring, inoculation)	15
C. Preparation of Culture Broth	10
D. Study of any industry visit for observing occupational incidents	10
E. Calculation of LC50 and LD50 for toxicity experiments	5
F. Viva Voce	10
G. Practical record/Chart/Model	5
H. Assignments	5
Total	75

G. O. S. 

Semester – VI

BES –C-601 Environmental Law

UNIT 1:

Constitution of India; fundamental rights; fundamental duties; National Green Tribunal. Legal definitions (environmental pollution, natural resource, biodiversity, forest, sustainable development); Article 48A (The protection and improvement of environment and safeguarding of forests and wildlife); Article 51 A (Fundamental duties).

UNIT 2:

The Indian Forest Act 1927; The Wildlife (Protection) Act 1972; The Water (Prevention and Control of Pollution) Act 1974; The Forests (Conservation) Act 1980; The Air (Prevention and Control of Pollution) Act 1981; The Environment (Protection) Act 1986;

UNIT 3:

The Public Liability Insurance Act 1991; Noise Pollution (Regulation and Control) Rules 2000; The Biological Diversity Act 2002; The Schedule Tribes and other Traditional Dwellers (Recognition of Forests Rights) Act 2006; The National Green Tribunal Act 2010;

UNIT 4

Stockholm Conference 1972; United Nations Conference on Environment and Development 1992; Rio de Janeiro (Rio Declaration, Agenda 21); Convention on Biological Diversity, Montreal Protocol 1987; Kyoto Protocol 1997; Copenhagen and Paris summits.

UNIT 5:

Role of Ministry of Environment, Forests & Climate; role of central and state pollution control boards. National Green Tribunal: Ganga Tanneries Case: M.C. Mehta vs. Union of India 1988, Environmental Policy of India

G. Dh

Environmental Disasters

UNIT 1

Hydrological, atmospheric & geological hazards; earthquake: seismic waves, epicenter; volcanoes: causes of volcanism, geographic distribution; floods: landslides, landslide analysis; drought: types of drought - meteorological, agricultural, hydrological, and famine; Glacial Lake Outburst Floods (GLOF);

UNIT 2

Impacts of anthropogenic activities such as rapid urbanization, injudicious ground water extraction, sand mining from river bank, deforestation, mangroves destruction; role of construction along river banks in elevating flood hazard; disturbing flood plains.

UNIT 3

Deforestation and landslide hazards associated with it; large scale developmental projects, like dams and nuclear reactors in hazard prone zones; nature and impact of accidents, wildfires and biophysical hazards. Case studies of Bhopal, Minamata and Chernobyl disaster.

UNIT 4

Concept of risk and vulnerability; two components of risk: likelihood and consequences, qualitative likelihood measurement index; categories of consequences (direct losses, indirect losses, tangible losses, and intangible losses); application of geoinformatics in hazard, risk & vulnerability assessment.

UNIT 5

Concept of mitigation; types of mitigation: use of technologies in mitigations such as barrier, deflection and retention systems; importance of planning, exercise, and training in preparedness; role of public and media in hazard preparedness.

GLOF 

BES – S – 603

Environmental quality management

Unit I

Environmental management system (EMS), Principle and components of EMS and quality management, Scope of EMS, environment and business schools, Application and Significance of EMS

Unit II

Certification for EMS, Environmental Standards, Basic Principles of ISO 9000 & ISO 14000 series, Bureau of Standards (BIS), Quality control, Environmental accounting, Environment management and evaluation

Unit III

Corporate environmental responsibility (CER), Corporate Social/Education/Health Responsibility, corporate mergers, approaches to corporate ethics.

Unit IV

Eco-labeling and Eco-mark, criteria for eco-labeling and eco-mark - uses and applications, GATT, WTO provision, Trade rules, Green Marketing and funding.

Unit – V

Environmental Audit, introduction, principle and component of environmental audit, different green audit variables: water, air, green and landscape, energy, solid waste, transport and human activities.

G. D. S. 

BES - C - 651: Lab Course

TIME: 6-8 HOURS

Max. Marks: 100

Sessional: 25 ESP: 75

A. Management practices of following Natural disasters:	5+5+5=15
(Three exercise to be given)	
- Earth quake	
- Volcanic eruption	
- Land slides	
- Tsunami	
- Floods/Cloud burst	
- Forest fire	
- Avalanches	
B. Environmental audit	15
(One exercise to be given)	
Prepare an environmental audit of hostel/institutes/industrial area/city.	
C. Report on environmental case studies related with Uttarakhand	10
- River Ganga pollution	
- All weather road	
- Riverbed mining	
D. Visit to any hydropower plant/barrage/mining area	10
E. Visit to any forest range of Rajaji National Park and report with reference to Forest Act/ Forest conservation Act 1980	5
F. Viva Voce	10
G. Practical record/Chart/Model	5
H. Assignments	5
Total	75
